

Saar Bio Pharm Catalog

Category : Cattle

Description :

PREMIX of feed additives for Cattle
Product based on sea algae, live yeast cultures and natural aluminosilicates. Formulated to prevent acidosis, restore an appropriate pH level in the rumen, flush toxins and purify the body. It has a protective effect on the rumen, increases feed intake and improves digestion processes.

SB BUFALGAN

f

Category : Poultry

Description :

complementary feed

Feed additives are a rich source of B vitamins and vitamin K necessary for the proper development of the animal. B vitamins have a beneficial effect on metabolism and weight gain.

SB VIT. B COMPLEX+K

Category : Cattle

Description :

PREMIX of feed additives for Cattle

The ingredients of the product correct the deficiency of calcium – an element which markedly supports the skeletal system. The product contains calcium, zinc, manganese, copper and magnesium in the form of readily absorbable chelates. The ingredients help to restore normal levels of these elements in the body. Calcio Gel should be administered to animals suffering from postpartum downer syndrome. Tryptophan is a precursor to serotonin which increases the content of calcium in the body.

SB CalcioGel

f

Category : Poultry

Description :

complementary feed

Feed additives supplement deficiencies of vitamin H (biotin) and zinc necessary for the proper functioning of the body.

SB VIT. H+ZN BIOTYNA

Category : Cattle

Description :

PREMIX of feed additives for Cattle
The preparation provides fast-absorbable calcium.

SB Calciumplusliquid

f

Category : Poultry

Description :

Liquid premix for Poultry
Feed additives prevent nutritional imbalance leading to problems associated with deficiencies of vitamins A, D3, E and K3. It increases immunity of the body. It stimulates regular and healthy growth.

SB AD3E+K3

Category : Cattle

Description :

PREMIX of feed additives for Cattle

The product components support proper functioning of the digestive system and formation of normal stool. Plant extracts present in the preparation are rich in tannins and support digestion. Carbon and bentonite bind toxins.

SB Carbocalf

f

Category : Poultry

Description :

PREMIX of feed additives

Components of the preparation have a strong sedative effect due to properly selected extracts of peppermint and valerian and precisely balanced addition of salt of sodium, potassium and magnesium.

SB ANTYSTRESS

Category : Cattle

Description :

PREMIX of feed additives for Cattle

The product components supplement calcium deficiency. In addition, magnesium reinforces the effectiveness of calcium. In addition, it supports raising the level of blood glucose.

SB Chelacium

f

Category : Poultry

Description :

Complementary feed for Poultry and Swine Feed additives while supplying specially stabilized active substances allow for maintaining nutritional balance. They stabilize bacterial flora of alimentary canal. They improve appetite what contributes to higher daily weight gain and at the same time improves final production result.

SB BACTRILL L400

Category : Cattle

Description :

PREMIX of feed additives for Poultry

Feed additives support the cardiovascular system. Copper chelate assist in enzymatic conversions, and is involved in the elimination of free radicals. Moreover, the chelate form ensures easier reach of copper to all cells of the body. This has a positive effect on the production of red blood cells and has a relaxant effect on the blood vessels. Feed additives have sedative properties, lower blood pressure, seal the walls of blood vessels and ensure elasticity of the arteries. It significantly enhances operation of the cardiac muscle.

SB Chelaphos Gel

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

Feed additives support the cardiovascular system. Copper chelate assist in enzymatic conversions, and is involved in the elimination of free radicals. Moreover, the chelate form ensures easier reach of copper to all cells of the body. This has a positive effect on the production of red blood cells and has a relaxant effect on the blood vessels. Feed additives have sedative properties, lower blood pressure, seal the walls of blood vessels and ensure elasticity of the arteries. It significantly enhances operation of the cardiac muscle. They reduce the number of falls.

SB CHELA CARDIO

Category : Cattle

Description :

Complementary feed for Calves and Piglets
Feed additives support proper functioning of digestive system and development of positive intestinal flora, improve appetite, increase absorption of nutrients, increase natural organism immunity, stimulate digestion and formation of proper stool. Plant extracts and essential oils present in the product are rich in phytoncides and tannins. Carbon and bentonite bind toxins. Zinc in the form of protected nanoparticles (which is twice smaller) significantly faster permeates through intestine walls and reaches lymphatic system.

SB CRYPTO CALF

f

Category : Poultry

Description :

Liquid feed premix for Poultry
Feed additives have a strong effect within intestine. They support appetite, eating and use of feed. It is recommended to administer after an antibiotic treatment.

SB COLIGREEN

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives are a rich source of energy, amino acids and vitamins necessary for the proper functioning of the body.

SB Energene

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

Feed additives support the positive development of the intestinal flora and improve appetite. They increase assimilability of nutrients, natural immunity and stimulate digestion.

SB COXIVIT

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Active substances of natural ingredients used in the composition of the preparation have a soothing effect, are easily absorbed and reach deep into the skin without causing additional irritation. For external use only.

SB Fitoderm

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

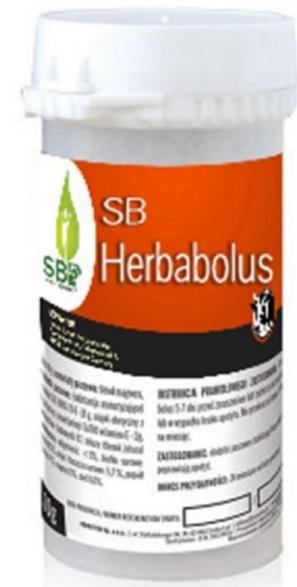

Components of the product supplement deficiency of vitamin C necessary for the proper development of the nervous and immune systems of birds and sodium deficiencies.

SB C-VIT

Category : Cattle

Description :

PREMIX of feed additives for Cattle
Feed additives stabilise bacterial flora, improve appetite.

SB Herbabolus

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry
The product components are a rich source of vitamin D3 and minerals necessary for proper bone development. Vitamin D3 regulates metabolism of calcium and phosphorus, and enhances their absorption from the intestine. It allows for an adequate development of egg shells in the case of laying hens. It has a positive effect on the laying period. Other minerals support the action of vitamin D3, regulate heart function, affect blood clotting and allow for easier absorption of the individual components.

SB D3-VIT-FORTE

Category : Cattle

Description :

PREMIX of feed additives for Cattle
Feed additives stabilise bacterial flora, improve appetite.

SB Herbitan

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry
Feed additives have a strong effect within intestine. They are rich in tannins and affect the composition of the intestinal bacterial flora by regulating its work. Tannic acid is a rich source of tannins.

SB DIAR STOP

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives regulate water and electrolyte balance and provide energy. Glutamine supports restoration of the intestinal membrane and intestinal villi. In case of danger, during or after recovery from digestive disorders (diarrhoea).

SB Hydrocalf

f

Category : Poultry

Description :

Liquid feed premix for Poultry

Feed additives providing animals specially stabilised active ingredients help to maintain nutritional balance. They stabilise bacterial flora of the digestive tract. They improve appetite and assimilation of feed which contributes to higher daily growth, thus improving the final result of the production.

SB GARLI PLUS

Category : Cattle

Description :

PREMIX of feed additives for Cattle
Feed additives support the proper functioning of the energy management of an animal. Betaine has a positive effect on the liver.

SB ketostop

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry
Feed additives providing animals specially stabilised active ingredients help to maintain nutritional balance. They stabilise bacterial flora of the digestive tract. They improve appetite and assimilation of feed which contributes to higher daily growth, thus improving the final result of the production.

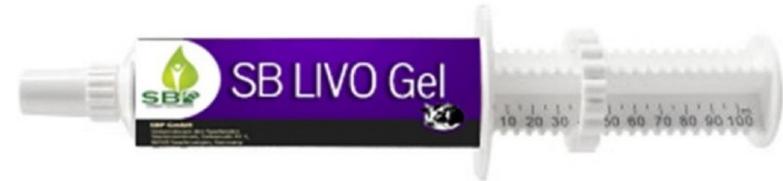

SB GARLIX

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives stimulate proper liver function. They speed up the process of liver cell regeneration and enhance the secretion of digestive enzymes. In addition, they regulate the level of cholesterol in the blood, producing a beneficial effect on the digestive, circulatory and nervous systems. They protect the body from damage caused by toxins, viruses and medications. The processes are additionally supported by the content of highly concentrated dry plant extracts. Methionine, among other effects, prevents fatty liver disease. In combination with protected choline chloride, it acts synergistically with other ingredients, boosting their activity. Protected choline chloride has a high level of bioavailability. It reaches the intestine in an unchanged form and is then absorbed into the body.

SB Livo Gel

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

Feed additives facilitate regulation of water and heat management of the animal. Additionally they have sedative properties that help in the event of adverse environmental conditions, or transportation and they supply energy.

SB HYDROTONIC+

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Components of the product enhance liver cell recovery and stimulate bile discharge. They control cholesterol level in blood, having a positive impact on the digestive system, circulatory system and nervous system. They protect against disturbances caused by toxins, viruses and medicines. Taurine – an essential amino acid required by the liver to remove harmful substances and toxic products of metabolism. It takes part in active trans-membrane transport and provides antioxidative protection. It plays an important part in normal liver functioning (production of bile acids and detoxification). Taurine helps with the delivery of creatine into muscles, resulting in its more efficient use. In addition, it acts as a metabolic transmitter.

SB LIVO liquid

Category : Poultry

Description :

PREMIX of feed additives for Poultry

The product components supplement the diet of birds with micro and macro elements necessary for intensive growth and during high laying period.

SB MINERALIX +

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives support proper liver functioning. They accelerate liver cells renewal and stimulate secretion of digestive enzymes. They regulate cholesterol level in blood having a beneficial impact on digestive system, circulatory system and nervous system. They protect from damages caused by toxins, viruses and medicines. Taurine an essential amino acid required by the liver to remove harmful substances and toxic products of metabolism.

SB Livo Powder

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

Feed additives have a strong sedative effect due to properly selected extracts of peppermint and valerian. Magnesium also supports this effect.

SB NERVIL

Category : Cattle

Description :

complementary feed

Feed additives affect positively functioning of the kidneys, whose improper operation may lead to disorders of secretion and excretion of urine, inflammation of the urinary tract and kidneys, gout and poisoning.

SB Nefritox

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

Feed additives have a strong effect within intestine. They support appetite, eating and use of feed. It is recommended to administer after an antibiotic treatment.

SB OREGOVIT

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives have a strong effect within intestine. They support appetite, eating and use of feed, act auxiliary at indigestion. It is recommended to administer after an antibiotic treatment.

SB Oregotox

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

Components of the product support uptake of water, flavourings neutralise the bitter taste of antibiotics. Thiamine (vitamin B1), anise oil and vanilla aroma have a favourable impact during the water uptake disorders.

SB PRO AQUA

Category : Cattle

Description :

Dietary feed for Cattle

Feed additives are indispensable for proper functioning of the organism. They equalize the water-electrolyte balance. They have a strengthening effect and are important metabolism regulators. The addition of glucose supplies energy sufficient for most living processes. In the case of hazard, during the hazard or after digestion disorders (diarrhoea).

SB OSMO POWDER

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

The product components provide substance indicated at the occurrence of the threat of infection of birds with fungal spores. They improve overall condition. Propolis also supports these processes.

SB PROBIL +

Category : Cattle

Description :

Complementary feed for Cattle

Feed additives support regulation of water and thermal balance of animals. Additionally they characterize with calming properties which help when disadvantageous environmental or transportation conditions are present and supply energy.

SB Osmo Tonic

f

Category : Poultry

Description :

PREMIX of feed additives for Poultry

Feed additives support the proper functioning of the respiratory system in poultry. They help reduce negative effects of high temperature. They are a source of natural menthol and cineole in high concentrations.

SB PULMOMIX +

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives support the proper functioning of the reproductive system in cattle. They increase greatly probability of effective insemination.

SB Ovofertil Gel

f

Category : Poultry

Description :

Liquid feed premix

Feed additives support the proper functioning of the respiratory system in poultry. They help reduce negative effects of high temperature. They are a source of natural menthol and cineole in high concentrations.

SB PULMOMIX S

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives enable formation of biofilm on intestine walls and intestinal villi. They regulate bowel function, have a positive impact on the composition of intestinal bacterial flora and bind toxins.

SB Pectocalf

f

Category : Poultry

Description :

Liquid feed premix for Poultry

Feed additives support the proper functioning of the respiratory system in poultry. They help reduce negative effects of high temperature. They are a source of natural menthol and cineole in high concentrations.

SB RESPIREN

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives enable formation of biofilm on intestine walls and intestinal villi. They regulate bowel function, have a positive impact on the composition of intestinal bacterial flora and bind toxins.

SB Pectostop

f

Category : Poultry

Description :

Liquid feed premix for Poultry

Feed additives support the proper functioning of the respiratory system in poultry. They help reduce negative effects of high temperature. They are a source of natural menthol and cineole in high concentrations.

SB RESPOMIX

Category : Cattle

Description :

PREMIX of feed additives for Cattle

The ingredients of the product correct the deficiency of potassium – an element which increases milk performance and supports body functions during periods of hot weather. A specially selected blend of flavouring substances increases urine output, which helps animals achieve sodium and potassium balance through the removal of excess sodium ions. In addition, it seals blood vessels and has a beneficial effect on mucous membranes. Potassium Gel can be administered during the intravenous supply of glucose. **NOTE!** Do not use the product during the cow drying-off period.

SB Potassium Gel

f

Category : Poultry

Description :

complementary feed

Feed additives supplement deficiency of vitamin E and selenium in the diet of birds. They exhibit antioxidant properties. They increase immunity of the body.

SB SELEMIX

Category : Cattle

Description :

PREMIX of feed additives for Poultry, Cattle and Swine

Feed additives support the development of positive bacterial flora in the intestine of the animal. It significantly improves condition of animals. The content of B, C and D3 vitamins also supports this process.

SB PROBIQ

f

Category : Poultry

Description :

complementary feed

Feed additives affect positively functioning of the kidneys, whose improper operation may lead to disorders of secretion and excretion of urine, inflammation of the urinary tract and kidneys, gout and poisoning.

SB SUPRACID

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives are a rich source of energy, amino acids and vitamins necessary for the proper functioning of the body.

SB Propowervet

f

Category : Poultry

Description :

complementary feed

Feed additives affect positively functioning of the kidneys, whose improper operation may lead to disorders of secretion and excretion of urine, inflammation of the urinary tract and kidneys, gout and poisoning.

SB URINEX

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives support the operation of the digestive system. They act protectively at antibiotic treatment and in case of a change of nutrition. They supplement shortage of energy.

SB Prostir Active

Category : Poultry

Description :

Vitamins E for treatment lake it

SB Evit Se

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives stimulate rumen mobility which supports its normal functioning. They facilitate rapid colonisation of active and vital flora (proper metabolism). They contribute to emptying the rumen and stimulate swallowing of feed.

SB Provent Gel

f

Category : Cattel

Description :

PREMIX of feed additives for Cattle

Components of the product support the process of elimination of excessive amount of gases in the digestive tract. Herbs present in the preparation are antismasmodic and support digestion.

SB Tympacalf

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Product components facilitate regeneration of the body through rapid compensation of loss of energy and electrolytes incurred during the birth. They normalise metabolic processes and support functioning of the immune system. Taste and smell of the product is pleasing to cows.

SB Providrink

f

Category : Cattel

Description :

PREMIX of feed additives for Cattle

Product components regulate the operation of the digestive system. They act protectively at antibiotic treatment and in case of a change of nutrition. They supplement shortage of energy.

SB Rumen Active

Category : Cattle

Description :

PREMIX of feed additives for Cattle

Feed additives help to increase eating dry matter, support better assimilability of feed, stabilise acid balance of stomach and intestines, increase of energy and increase of milk production.

SB Provitalvet

f

Category : Cattel

Description :

complementary feed

Compound feed for use in calves immediately after calving and after antibiotic treatment. It is a rich source of colostrum, probiotic bacteria and vitamins.

SB Startercalf

Category : Cattle

Description :

PREMIX of feed additives for Cattle
Feed additives support the proper functioning of the respiratory system in cattle.

SB Pulmocalf

f

Category : Cattel

Description :

complementary feed

The ingredients of the product have a stimulating effect on the metabolism of mother's milk, increase appetite and immune efficiency of colostrum. They stimulate formation of positive bacterial flora and support intestinal activity during periods of stress. They reduce the risk of diarrhoea.

SB Supercalf

Category : Cattle

Description :

PREMIX of feed additives for Cattle and Swine
The product components support the proper functioning of the respiratory system in cattle and horses. Herbs and essential oils found in the preparation have anti-inflammatory, anti-septic and antipyretic properties.

SB Pulmo Powder

f

Category : Cattel

Description :

Complementary feed for Poultry
Product components support the development of intestinal villi and growth stimulation through the increase of assimilability of nutrients and development of positive bacterial flora. They increase the natural immunity of the organism and stimulate digestion.

SB VILLIVET

Category: Cattel

Description:

Powder used against respiratory and intestinal infections caused by micro organisms susceptible to as Doxycycline in poultry.

SB Doxan

f

Category: Cattel

Description:

Powder can be used in poultry, against respiratory and intestinal infections, caused by microorganisms susceptible to Doxycycline and/or Colistin, as colibacillosis, salmonellosis, pasteurellosis and leptospirosis.

SB Doxanisten

Category: Cattel

Description:

Mainly used for the virus diseases of commom cold, influenza, New-castle disease(ND), Infectious bronchitis(IB), etc.

SB Stop-VIR

f

Category: Poultry

Description:

Builds immune system, improves digestion, increases energy, supports healthy eyes & ears, pro,otes healthy skin & coat, and relives itching & scratching.

SB Immunoplus

Category: Cattel

Description:

indicated for preventive and therapeutic treatment of gastrointestinal and respiratory tract infections, caused by florfenicol sensitive micro-organisms, such as Actinobacillus spp., Pasteurella spp.; Salmonella spp. and Streptococcus spp. in swine and poultry.

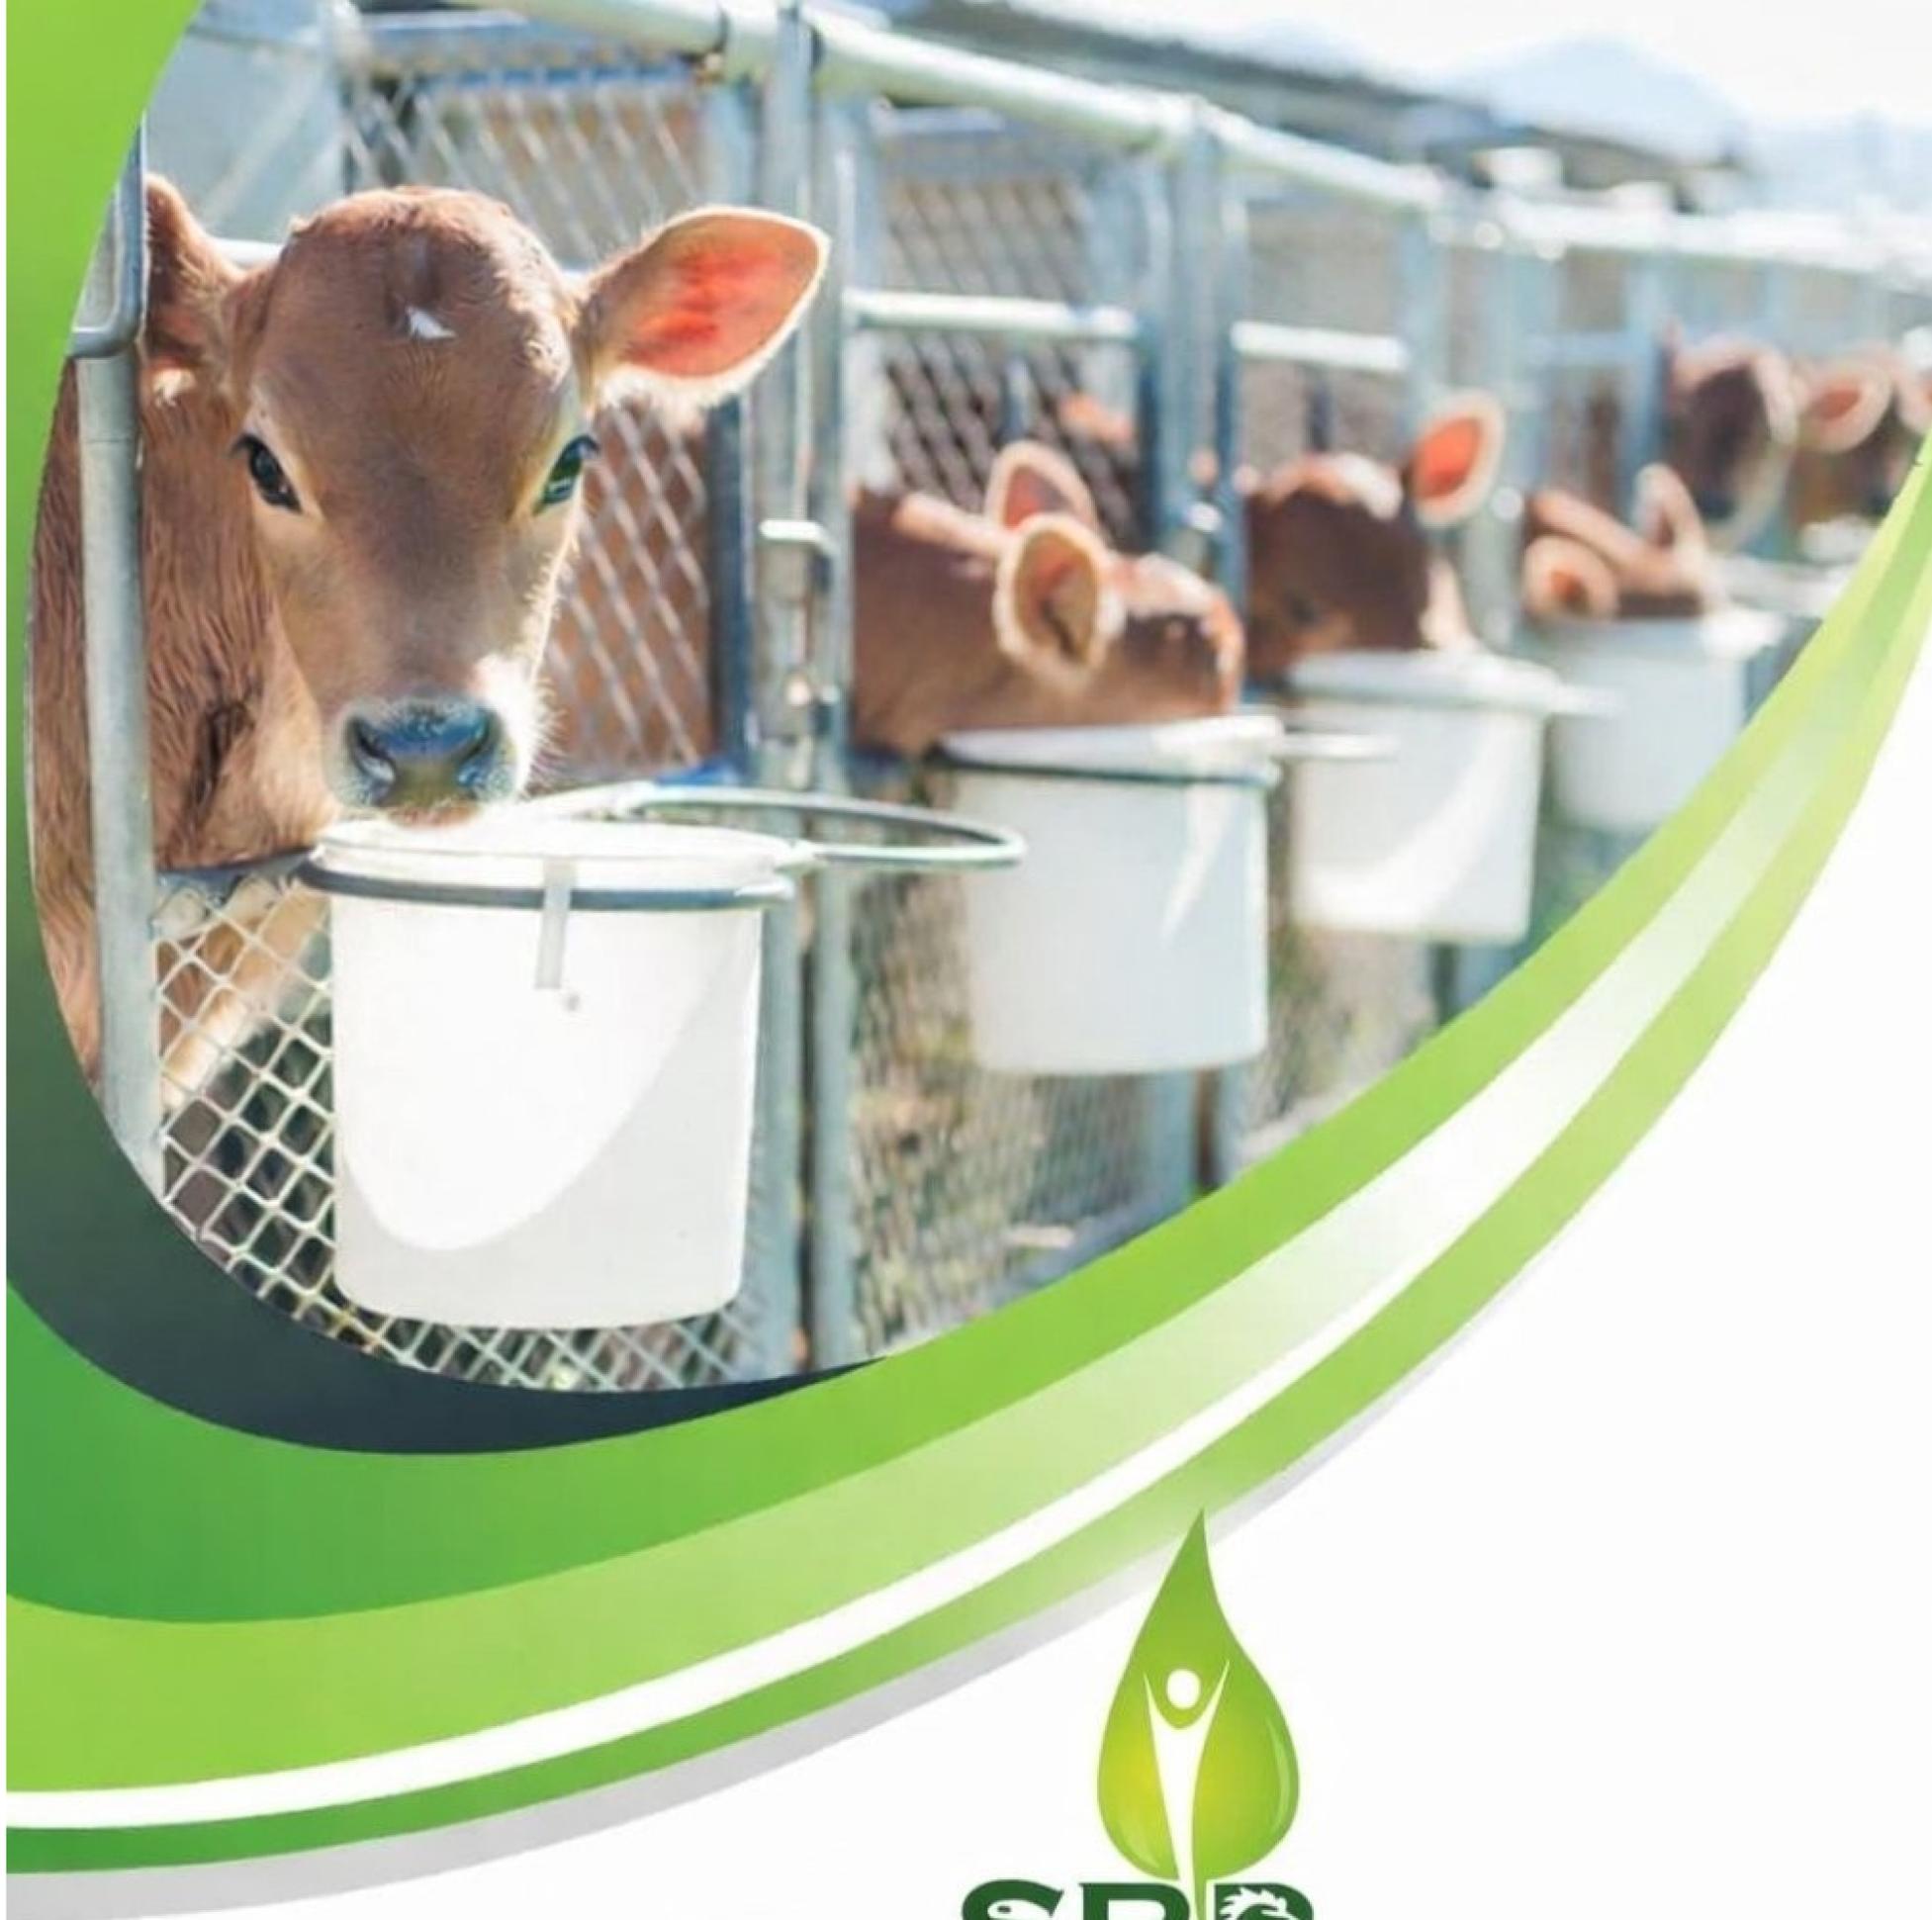

SB Sfloraban

f

OUR AIM is to become the preferred supplier and trusted business partner of major distributors around the world.

OUR MISSION is to produce and distribute products that improve human and animal well-being and assist those specialists to deliver first class care at reasonable cost.

WE ARE FOCUS ON customer satisfaction and efficient manufacture enable us to offer top quality products at exceptional value. By maximizing our efficiencies to achieve low costs and, by keeping our aims high.
